Community Protection:

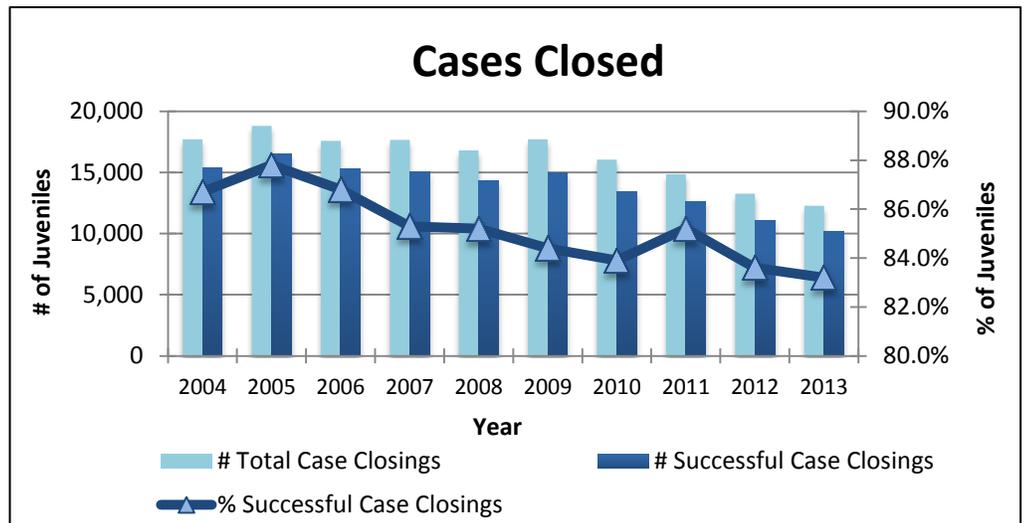

The citizens of Pennsylvania have a right to safe and secure communities.

The juvenile justice system has a responsibility to protect the community from known juvenile offenders. Juveniles who do not commit a new offense while under court supervision have a higher probability of remaining crime free.

Since 2004, county juvenile probation departments have supervised and closed 162,622 cases. The proportion of cases closed successfully over this time is 85%.

- # and % of juveniles who successfully completed supervision without a new offense resulting in a Consent Decree, Adjudication of Delinquency, ARD, Nolo Contendere, or finding of guilt in a criminal proceeding:

Accountability:

In Pennsylvania, when a crime is committed by a juvenile, an obligation to the victim and community is incurred.

The juvenile justice system has a responsibility to ensure that juvenile offenders meet their obligation to repair the harm caused by their crimes. It is important that juvenile offenders make and fulfill a commitment to living crime-free lives. Through the completion of meaningful community service, juvenile offenders demonstrate their commitment to making amends for the harm their actions have caused.

The number and percentage of juveniles who complete assigned community service obligations and the number of community service hours completed are the primary measures of success. Most juvenile offenders complete their community service assignments, and the community receives valuable service from these juveniles.

Victims of juvenile crime are entitled to be restored, to the extent possible, to their pre-crime economic status. The payment of restitution by the juvenile offender is one of the most important outcomes sought by victims. The number and percentage of juveniles who make full restitution to their victims, and the amount of restitution paid are measures of how successful the system is in achieving offender accountability and victim restoration.

Since 2004, juvenile offenders have completed 5,263,478 hours of community service. The value of the community service hours completed equates to services worth approximately \$38,160,215.50 based upon a minimum wage of \$7.25 per hour. Additionally, victims of juvenile crime have received \$23,948,014 in restitution from juvenile offenders.

Competency Development:

Juveniles, who come within the jurisdiction of Pennsylvania's juvenile justice system, should leave the system more capable of being responsible and productive members of their communities.

Areas in which one could reasonably expect young people in trouble with the law to build and demonstrate competencies depending on their age and stage of development are Pro-Social Skills, Moral Reasoning Skills, Academic Skills, Workforce Development Skills, and Independent Living Skills.

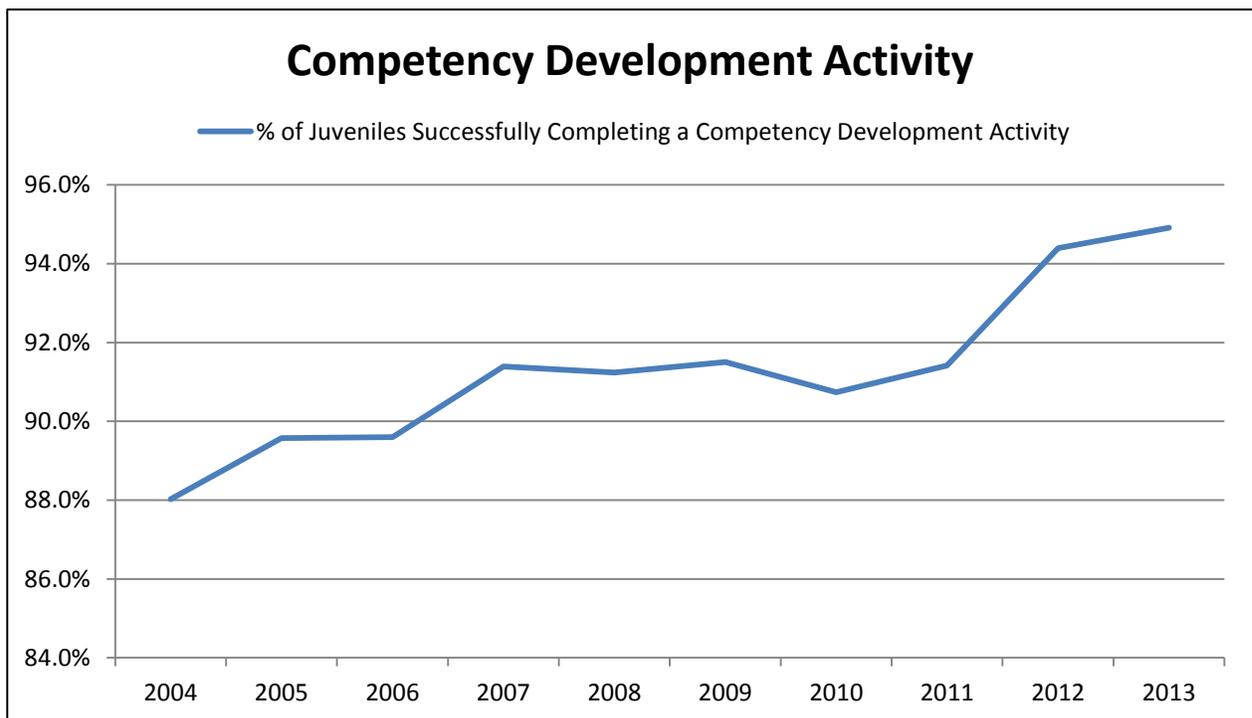

Additionally, juveniles who are either in school or working have a significantly greater chance of not belonging to a gang, and avoiding criminal behaviors such as theft, assault, selling drugs, and carrying a handgun.
